

BEACHMERE

Vol 1 December 2020

Community Garden

WELCOME

Welcome to the first Beachmere Community Garden (BCG) newsletter. Just a quick recap of where we are at the moment.

Our meeting on the 14th November allowed a motion to be passed to incorporate the BCG. Thank you all for attending and a special thank you to Chris from the RSL for helping out in our hour of need!

The paperwork for incorporation has been submitted and as soon as it is accepted we can schedule the next general meeting.

Councilor Booth has passed on his congratulations and has again confirmed his support for the garden.

In regards to the important task of networking with other local groups we have already had some excellent work done:

- Colleen has drafted a letter for assistance from the local rotary group
- Kim has discovered a bush tucker garden at

the Caboolture historical society. We will be getting in contact to see if they can assist in any way

- I have been continuing to volunteer at the Wallum Action Group nursery, who have said they will assist wherever they can.

The next step is to hold a meeting with council to discuss locations for the garden. If you have any thoughts on where will be a good spot, please send an email and let us know.

As I mentioned earlier, we will be holding a general meeting in about 4 weeks. At this meeting all provisional positions will be vacated and a vote taken to fill all positions on a permanent basis.

Thanks again for all the help so far in getting this garden up and running.

Cheers,

David Fraser

THINGS WE NEED

PLANTS

Comfrey
Pidgeon Pea
Vetiver grass
Indigenous food plants
Bird and bee attractors
(Banksias, grevilleas etc.)
Fruit trees

LANDSCAPING

Large pots
Hardwood Sleepers
Irrigation
Rain water tanks
Pavers

PEOPLE

Media manager
Grant application writers
Local food experts
New members!

COMMUNITY

Below are some photos of other community gardens and nurseries in the region that have some great design ideas. Let me know what you think and please send any photos of ideas you have seen that would be good for our garden.
